

DVSI & bioplastics MAGAZINE present a first of its kind event:  
The biobased polymer supply chain meets the toy maker industry and trade.

# bio!TOY

**B2B Conference 27-28 Mar 2019**  
Nuremberg „ToyCity“, Germany

supported by  **DVSI**

“The biobased plastics industry can supply polymers and compounds that offer functionality and sustainability benefits, such as low CO<sub>2</sub> emissions. Applications will represent what the #NewPlasticsEconomy is all about: Circular, safe products made from renewable resources. To maintain a great quality of life for our children.”

*Dr. Harald Kaeb, expert for biobased chemistry, founder of narcon InnovationConsulting*

“The toy industry is looking for more sustainable materials for the manufacture of its products and packaging. We are exploring the opportunities that novel, biobased plastics can offer. The conference will help our members to learn, create visions and goals, and establish collaboration along the value chain.”

*Ulrich Brobeil, Managing Director, German Toy Maker Association*

## Why participate?

- More than 20 presentations with a focus on suitable materials and user experiences
- Background information on regulation / policy, and funding opportunities in EU
- Focused table-top exhibits from business and technology leaders
- Opportunity to interact and promote business development through dialog
- Media and PR programme to get your message out
- Call for papers still open – contact: [mt@bioplasticsmagazine.com](mailto:mt@bioplasticsmagazine.com)

**Confirmed speakers include:** Lego, BioSeries, BioBlo, eKoala, Braskem, FKUR, DVSI and ...  
Information on programme, exhibition and sponsoring: [www.bio-toys.info](http://www.bio-toys.info)

**Toys Go Bio.  
A Perfect Match.**

BioBlo® bricks from wood and Green PE

Gold Sponsor

**Braskem** 

Silver Sponsor

**FKUR**  
plastics - made by nature!
